

ELECTRICAL & INSTRUMENTATION

Overview

Bright Group

We are an Australian-owned specialist provider of multi-disciplinary trade services supporting shutdowns, maintenance, projects, and ongoing operations. We prioritise data-driven decision-making, responsive execution, and the continuous development of our people.

Since our founding in 2007, we have grown from a small team focused on access services into a comprehensive, end-to-end service provider. Today, we offer a wide range of capabilities, including scaffolding, rope access, mechanical, electrical, design, and training.

What sets us apart is our ability to manage projects of any size or complexity while maintaining the highest standards of quality, safety, and reliability. Our clients value us not just for completing the work, but for delivering it right, every time.

Consortium of Companies:

Capabilities:

- Project Delivery
- Maintenance
- Operations & Shutdowns
- Planning

- Design

The way we work

Safety

Safety is at the core of who we are. The health, safety, and well-being of our people, partners, and communities guide every decision we make. We foster a culture of accountability, integrity, and respect – ensuring everyone goes home safe, every day.

Diversity & Inclusion

Diversity strengthens our teams and drives innovation. We're committed to an inclusive workplace that values all backgrounds and perspectives, promotes equal opportunity, and builds stronger connections with our people, clients, and communities.

Sustainability

We're committed to sustainability and responsible corporate citizenship. By integrating Environmental, Social, and Governance (ESG) principles across our operations, we minimise environmental impact, support our communities, and drive innovation for a more sustainable future.

Approach

We are agile and collaborative. Our experienced leaders make informed decisions with clarity and efficiency. Supported by extensive internal resources, specialised equipment, and a national network, we mobilise the right support and adapt seamlessly to the changing needs of the work.

THINK CHANGE, THINK BRIGHT

Electrical & Instrumentation

We deliver comprehensive electrical and instrumentation services across the resources and industrial sectors – from routine maintenance through to complex capital, brownfield and greenfield projects. Our approach is built on an unwavering commitment to safety, quality, and operational reliability, ensuring every system we work on meets the highest industry standards.

We provide specialised electrical and instrumentation capabilities to deliver critical infrastructure safely, efficiently, and in full compliance. By working closely with our clients, we design and implement tailored solutions that support long-term performance, reduce downtime, and minimise operational risk.

Our in-house expertise spans a wide range of electrical and instrumentation services, including:

- Fixed plant E&I construction and maintenance
- Sustaining capital, plant upgrades, and brownfield E&I projects
- MCC, substation, transformer, and switchyard installations and upgrades

- High voltage, low voltage, instrument, and control cabling and terminations
- Earthing, lighting, and hazardous area installations
- Instrument air and tubing systems
- Shutdown planning, management, and execution
- Constructability reviews and civil works for underground cable containment
- Pre-commissioning, commissioning, and start-up services and standardisation

Our experienced Electrical Engineers, Supervisors, and skilled trades teams operate effectively in live and complex environments, delivering robust, reliable systems that enhance asset performance.

With strong planning, proven systems, and national delivery capability, we integrate seamlessly into existing operations – delivering safe, efficient, and future-ready electrical and instrumentation solutions.

Safe systems. Reliable performance. Built to last.

End-to-End Electrical & Instrumentation Delivery

Installation, Maintenance & Operational Support

We deliver comprehensive electrical, instrumentation, and controls services across projects, maintenance programs, and shutdowns in Australia’s major sectors. Our skilled teams work closely with client operations to plan, install, maintain, and repair critical electrical systems, ensuring all works meet strict safety, quality, and compliance standards. Through disciplined execution and proactive coordination, we support reliable system performance while minimising downtime and operational disruption.

Integrated Controls & Systems Installation

Central to our electrical capability is the delivery of robust switchgear, control systems, and in-ground electrical services tailored to site-specific requirements. Our engineers design and install scalable control and instrumentation systems, including precise instrument installation and tubing, to ensure safe operation and long-term reliability. By combining experienced trades, strong planning, and proven methodologies, we deliver safe, efficient, and dependable electrical and instrumentation outcomes that support operations from installation through to ongoing maintenance.

Future-Focused Electrical & Instrumentation Solutions

We specialise in delivering high-quality, forward-thinking electrical and instrumentation solutions across metropolitan, regional, and remote operations.

Our focus areas include:

Innovative, future-ready electrical and control systems

Safety-driven design, installation, and maintenance

Proactive planning and optimisation

Reliable, long-term system performance

Compliance-led, quality-assured delivery

Our commitment to innovation and quality ensures every solution is designed with the future in mind. By leveraging technology, strategic planning, and

in-house expertise, we anticipate challenges, optimise performance, and deliver systems that perform reliably in demanding environments. Our approach prioritises safety, efficiency, and durability – providing clients with confidence that their electrical and instrumentation assets are built to last.

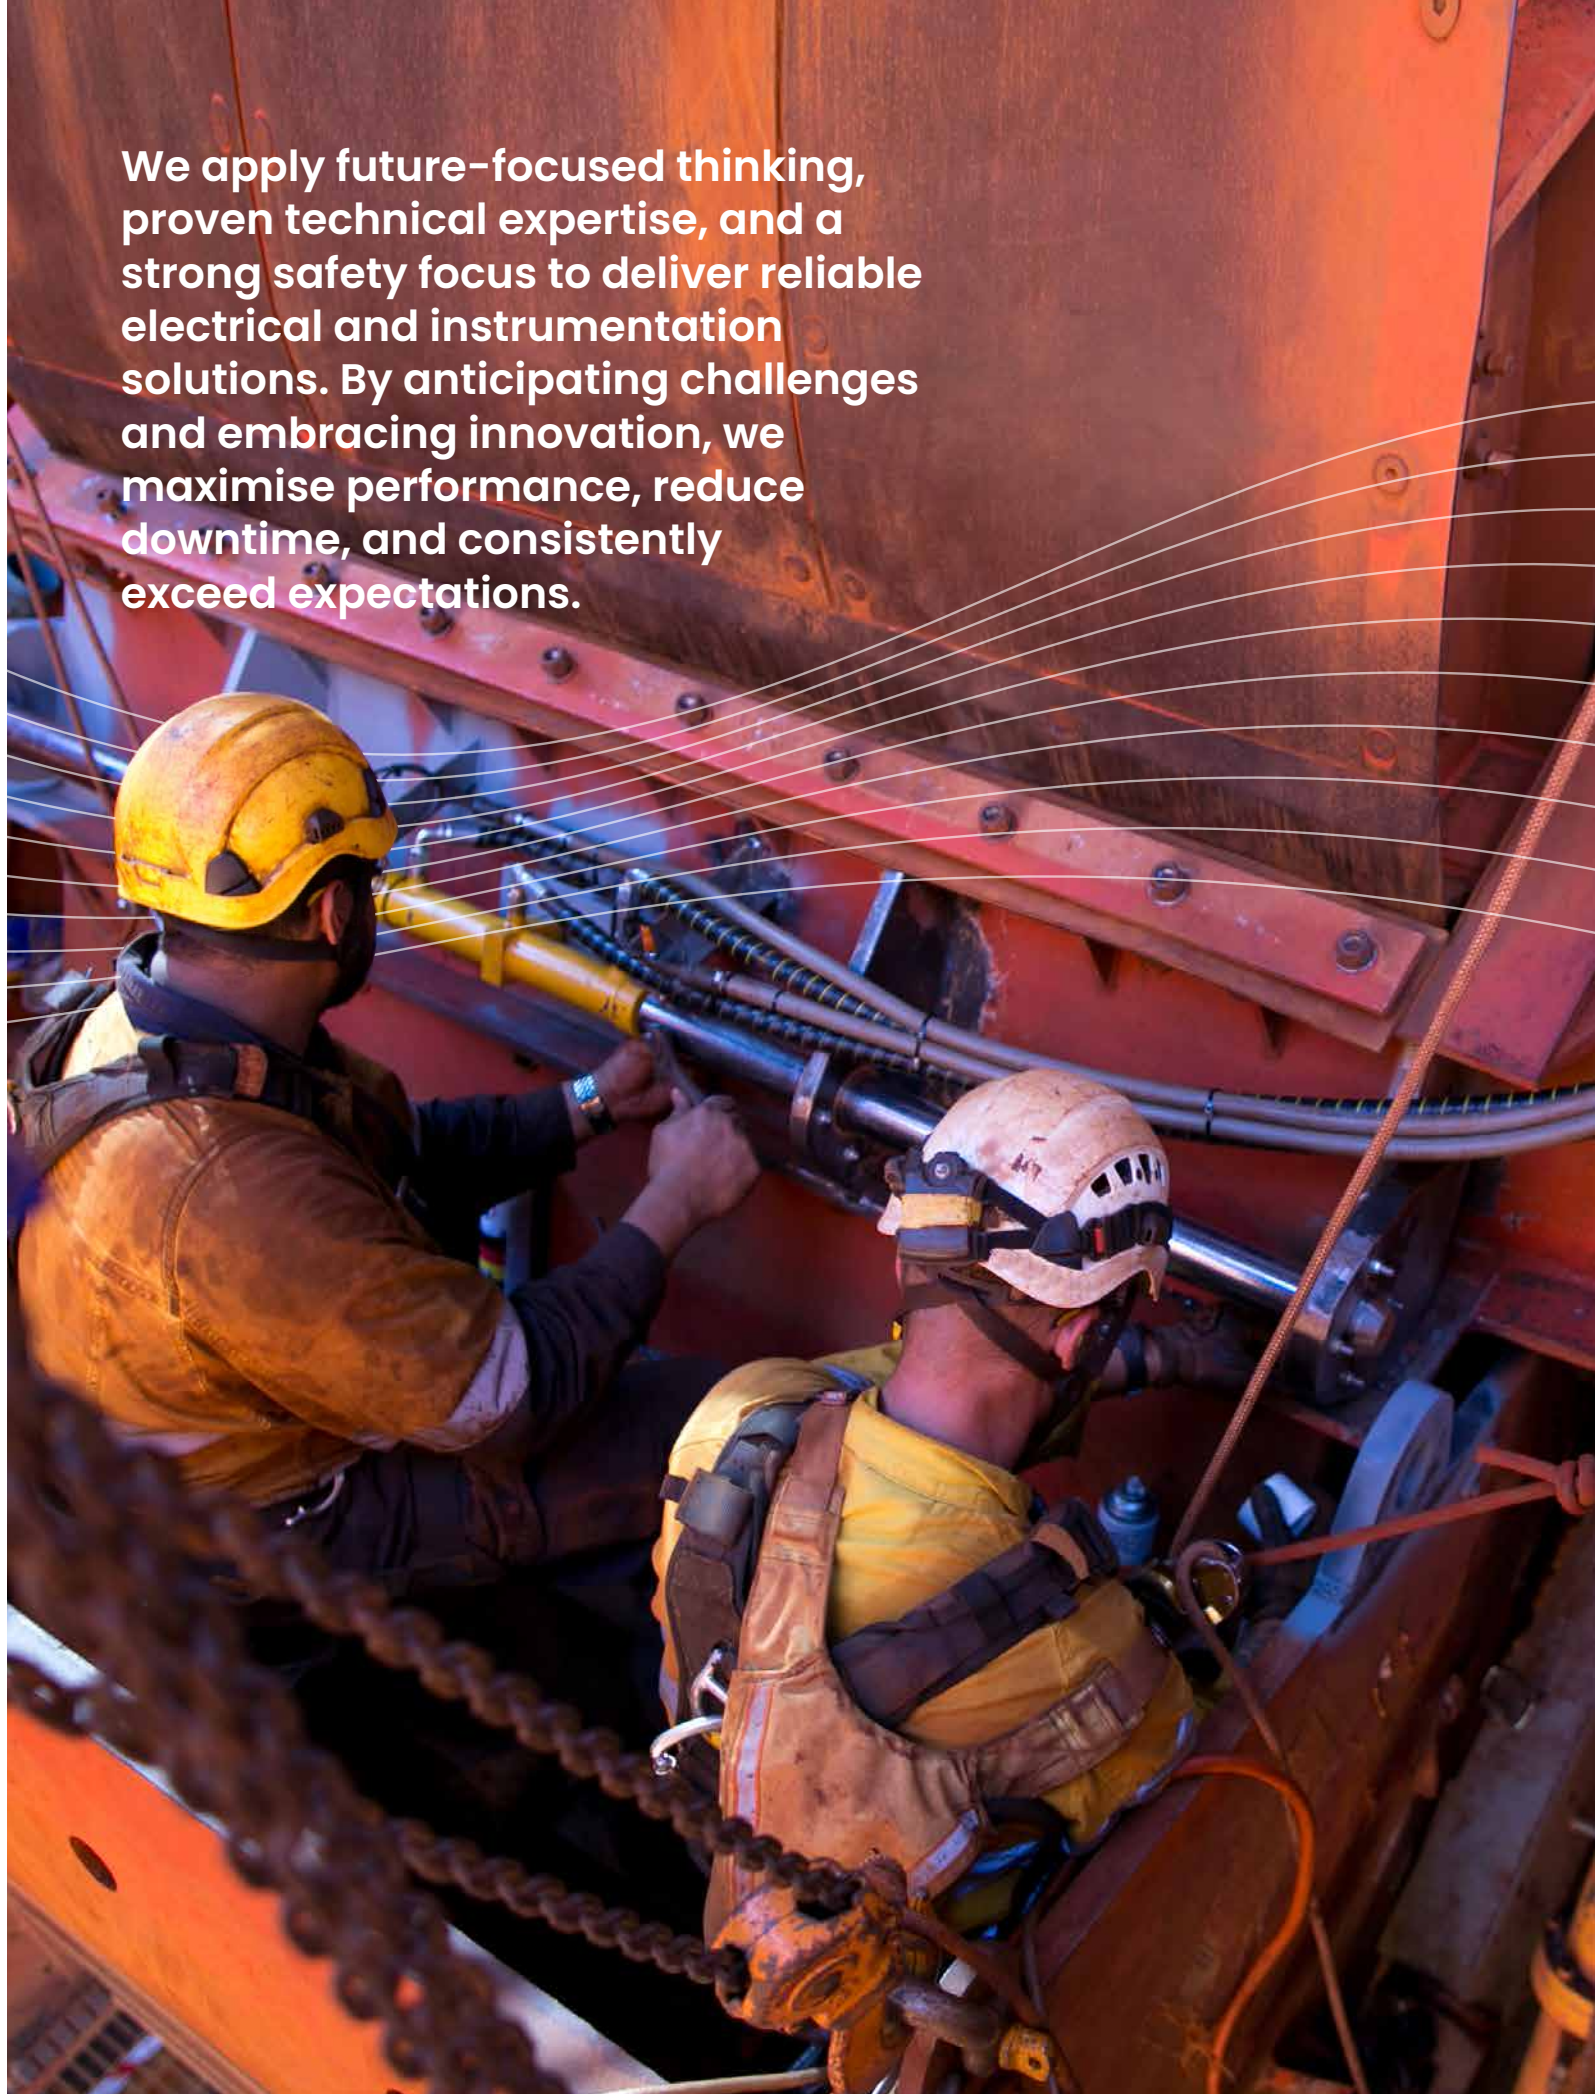

If you have an upcoming project or would like to discuss how we can support your electrical and instrumentation requirements, please contact us – we’re ready to deliver safe, efficient, and future-ready solutions.

**Designed for tomorrow. Delivered today.
One trusted partner.**
