

MAINTENANCE

Overview

Bright Group

We are an Australian-owned specialist provider of multi-disciplinary trade services supporting shutdowns, maintenance, projects, and ongoing operations. We prioritise data-driven decision-making, responsive execution, and the continuous development of our people.

Since our founding in 2007, we have grown from a small team focused on access services into a comprehensive, end-to-end service provider. Today, we offer a wide range of capabilities, including scaffolding, rope access, mechanical, electrical, design, and training.

What sets us apart is our ability to manage projects of any size or complexity while maintaining the highest standards of quality, safety, and reliability. Our clients value us not just for completing the work, but for delivering it right, every time.

Consortium of Companies:

Services:

- Electrical & Instrumentation
- Rope Access
- Scaffolding
- Structural, Mechanical and Piping

The way we work

Safety

Safety is at the core of who we are. The health, safety, and well-being of our people, partners, and communities guide every decision we make. We foster a culture of accountability, integrity, and respect – ensuring everyone goes home safe, every day.

Diversity & Inclusion

Diversity strengthens our teams and drives innovation. We're committed to an inclusive workplace that values all backgrounds and perspectives, promotes equal opportunity, and builds stronger connections with our people, clients, and communities.

Sustainability

We're committed to sustainability and responsible corporate citizenship. By integrating Environmental, Social, and Governance (ESG) principles across our operations, we minimise environmental impact, support our communities, and drive innovation for a more sustainable future.

Approach

We are agile and collaborative. Our experienced leaders make informed decisions with clarity and efficiency. Supported by extensive internal resources, specialised equipment, and a national network, we mobilise the right support and adapt seamlessly to the changing needs of the work.

THINK CHANGE, THINK BRIGHT

Trusted maintenance solutions for process and non-process infrastructure

Drawing on extensive experience across Australia’s mining, resources, and industrial sectors, Bright Group delivers integrated maintenance solutions that keep operations running safely, efficiently, and without interruption.

As a leading maintenance partner, we have decades of experience supporting hundreds of mining and industrial plants. Our highly skilled teams work collaboratively with client personnel to provide tailored maintenance programs that align with operational goals, production targets, and safety standards.

From preventative maintenance and equipment overhauls to spare parts management and shutdown execution, our focus is on maximising plant reliability, minimising downtime, and extending asset life. We work to reduce the risk of equipment down time, as well as ensure optimal plant performance.

We integrate seamlessly into existing maintenance frameworks or conduct full system reviews to design and implement optimised strategies that meet specific operational requirements.

Understanding the importance of reliability, safety, and compliance, at Bright Group we deliver comprehensive maintenance services – including routine, preventative, planned, and unplanned maintenance – to support both process and non-process infrastructure across Australia’s most demanding environments.

Our maintenance specialities include:

Routine maintenance
Preventative maintenance
Planned maintenance
Unplanned maintenance
Retrofitting existing plant
Spare parts service
Maintenance Strategy
Fabrication and installation

Smart maintenance. Safe outcomes. Better results.

Maintenance Excellence

Comprehensive Maintenance Solutions

At Bright Group, our approach to maintenance goes beyond routine servicing – we focus on system reliability, lifecycle optimisation, and long-term asset performance. By integrating planning, engineering, and execution disciplines, we ensure every maintenance activity contributes measurable value to operations.

Our strength lies in developing structured maintenance frameworks that improve predictability and performance. Using data-driven planning tools and disciplined scheduling, we help clients optimise resource allocation, extend asset life, and minimise production impacts.

With a proven record of delivery across complex industrial environments, our teams provide the agility to scale support as operational needs change – from shutdown campaigns to continuous maintenance programs.

A Proven Partner in Performance

We partner with clients to enhance operational resilience and reliability through disciplined maintenance execution and continuous improvement. Our performance-driven culture ensures every task is completed safely, efficiently, and to the highest standard.

Through predictive insights, robust reporting systems, and an unwavering focus on quality, we help clients anticipate maintenance requirements before they become critical. This proactive approach drives improved plant uptime, reduced operating costs, and greater overall productivity.

As a trusted maintenance partner, we deliver consistency, accountability, and confidence across all aspects of asset management – supporting our clients’ success in even the most demanding operational environments.

Maintenance Expertise That Delivers Results

At Bright Group we provide end-to-end maintenance solutions designed to improve asset performance and operational uptime. Our capabilities span:

Fixed plant maintenance – conveyors, chutes, crushers, tanks, piping, and structural components

Mobile equipment support – fleet servicing, component change-outs, and rebuilds

Shutdown and turnaround management – planning, resourcing, execution, and critical path recovery

Fabrication and site installation – workshop and on-site repairs, upgrades, and modifications

Condition monitoring and inspection services – predictive analysis to identify early-stage equipment risks

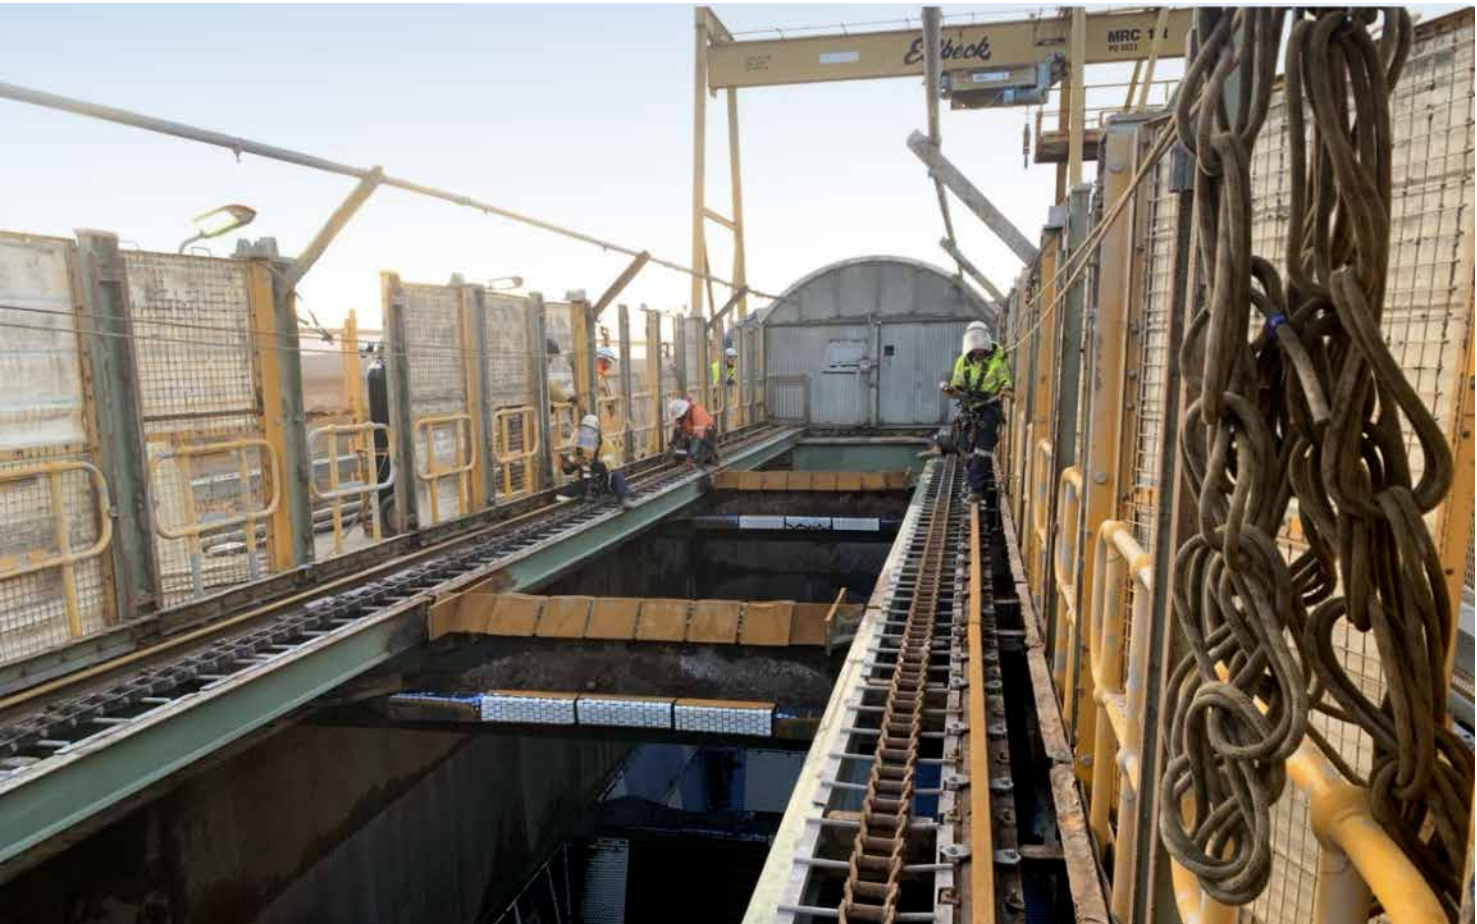

Each service is backed by our integrated planning systems, quality controls, and commitment to zero harm.

Our integrated approach brings together skilled trades, planners, and engineers to deliver flexible, scalable maintenance solutions whether embedded within existing frameworks or operating as a standalone service provider. By combining technical expertise, proven systems, and a strong safety culture, we deliver outcomes that maximise plant availability and reliability.

If you're seeking a dependable partner to support your maintenance goals, we're ready to help bring capability, performance, and reliability to every maintenance program we are involved in.

Your project. Our expertise. One trusted partner.
